- Desktop Publishing
- Software Localization

We are great at the core of our business – translation and localization! We adapt our clients' business, technical, marketing and legal communications to new languages. This helps them sell their products and perform their services more efficiently around the world. From technical translation to marketing collateral to graphics, we are well equipped to localize your documents.

We consistently translate documents related to specific industries such as manufacturing, software, tourism, and retail. We also provide a full suite of services such as document translation, website localization, eLearning, software localization and voiceover.

## Asian Language Expertise

Our linguists are highly qualified specialists with extensive professional backgrounds in technical, medical, legal and business areas. Subject matter experts from all major industries provide valuable feedback on every translated document, while experienced project managers use the latest software to ensure rigorous adherence our Quality Assurance process.

Our professional linguists live and work in your target language's geography. Your document will be translated in accordance with each language's linguistic nuances, and will reflect the most accurate, up-to-date terminology and style.

### 3,500+ Linguists

# Multimedia & Voiceover

VEQTA Translation provide turnkey solutions for projects containing video and audio content for a comprehensive range of languages and media types. We have comprehensive, multilingual multimedia production capabilities to create multilingual versions of eLearning modules, interactive assessments, training materials, games, or virtually any combination of content, audio, and visual components. We have recorded and directed dubbing and voiceover recording productions for audiobooks, corporate presentations, airline safety systems, commercials and radio shows.

## Studio Voiceover Recordings

Professional studio voice-over recording using native speaking talent United Nations style voice overlay, lip syncing, on-screen voice-over or dialogue replacement, script translation and pronunciation guides

Part of our process entails offering you samples of gender and style-specific voices, ensuring we combine the best overall voice-over talent to fit for your multilingual needs.

## Multimedia Localization

At VEQTA Translation, our multimedia localization services run the gamut, including script translation and professional voice-over recording for almost any type of content:

- eLearning and educational materials
- Mobile applications
- Webinars and web video
- Documentaries
- Video / Authoring Localization
- Animation

## eLearning Localization

- Localization and adaptation of online and interactive content
- Graphics localization
- Assessment and quiz localization
- Comprehensive multimedia authoring
- Full validation of target-language modules
